# More Music. Less Microbes.

Eastman Music Company proudly presents “Infection Control for Instruments (ICI),” a free e-book about what germs are, how they get around, and how to protect yourself and those in your care, not only from one germ today, but from many germs, always. ICI starts at the very beginning and ventures deep into professional concerns, offering real support to individual players and to instrument handlers at all levels.

This valuable resource is the first of its kind and free for everyone, for the benefit of the entire music community.
